Hiring Team

Capital Heating, Cooling, Plumbing & Electric

Dear Hiring Team,

I'm writing to apply for your **Data Entry I/II** remote position. I'm a US-based professional with 8+ years of combined experience entering, reviewing, and maintaining accurate data across medical marketing, clinical care, and software development.

From 2017 to 2021 I worked as a medical marketer for Only Love Home Care, where the bulk of my role was entering and maintaining referral data for hundreds of physicians across the Rio Grande Valley. Reviewing records for accuracy and following standardized procedures was the core of the work — small errors carried real consequences, so attention to detail was non-negotiable.

I followed that with a year as a Physical Therapy Technician at XO Physical Therapy (2021–2022), entering patient encounters into EMR systems daily and reviewing my own work before submitting to billing. After completing my Doctor of Physical Therapy degree at the University of St. Augustine School of Health Sciences, I also designed and built my own financial web application from scratch — managing a PostgreSQL database, validating thousands of records daily, and learning new tools as needed. That project keeps my technical skills sharp and means I'm comfortable picking up any data-entry platform quickly.

I have reliable home internet, work efficiently without supervision, and bring the kind of careful, repeatable work that data entry rewards. I'd welcome the chance to support Capital Heating's records operations.

Thank you for your time and consideration. I'd be happy to make myself available for an interview at your convenience.

Sincerely,

Elian Bazan
